

4 Courses

Python Essentials for MLOps

DevOps, DataOps, MLOps

MLOps Platforms: Amazon  
SageMaker and Azure ML

MLOps Tools: MLflow and  
Hugging Face

May 18, 2023

**Erwin Pasia**

has successfully completed the online, non-credit Specialization

# MLOps | Machine Learning Operations

The student has successfully completed the Specialization, laying a strong foundation in Python fundamentals, MLOps principles, data management, and the deployment of machine learning models in production environments. The student acquired hands-on experience with Amazon Sagemaker, AWS, Azure, MLflow, and Hugging Face, developing their ability to create end-to-end ML solutions, pipelines, and APIs. The student has also learned to: apply exploratory data analysis techniques; use AI pair programming and GitHub Copilot; train, optimize, and deploy ML models on Amazon SageMaker and Azure ML; design full MLOps pipelines with MLflow, managing projects, models, and tracking system features; and deploy Large Language Models and containerized models using the ONNX format with Hugging Face.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.

Noah Gift ASD/2023

Noah Gift, Executive in  
Residence in the Duke  
Social Science Research  
Institute

Alfredo Deza, Adjunct  
Assistant Professor in  
the Pratt School of  
Engineering
